

# EN-3212 Electronics Worksheet 6

## Complex numbers and Euler's Formula

Given following real, imaginary, and complex numbers:

$$C1 = 8 + j3 \quad C2 = 4 - j6 \quad C3 = -2.4 + j3.8 \quad C4 = 7.32 \quad C5 = -j2.57$$

1. Find the following:

$$\begin{array}{llllll} C1 + C2 & C1 - C2 & C1(C2) & C2 - C3 & C1(C3) & C4 + C5 \\ C1(C4) & C2(C5) & & & & \end{array}$$

2. Write the complex conjugates  $C1^*$ ,  $C2^*$ ,  $C3^*$ ,  $C4^*$ , and  $C5^*$ .

3. Find the following:

$$C1(C1^*) \quad C3(C3^*) \quad C4(C4^*) \quad C5(C5^*)$$

4. Write out Euler's Formula.

5. If  $C3$  is a complex voltage, use Euler's formula to find the Amplitude and phase of that voltage.

6. Repeat that process for  $C1$ ,  $C2$ ,  $C4$ , and  $C5$ .
